Presidential Address. The function of a welding society
by J. F. Lancaster 3
Metallurgical study of resistance weld nugget formation and stuck welds
by A. F. J. Dix 7
Electron beam welding - the need for further development as revealed from production experience
by A. H. Meleka and J. K. Roberts 16
The use of overstressing techniques to reduce the risk of subsequent brittle fracture (Part 1)
by R. W. Nichols 21
Guy Parsloe - Secretary 1943-67 51
Survey of parallel-gap welding techniques using automatic pulse width compensation
by E. F. Koshinz 53
The influence of sulphur on heat-affected zone cracking of carbon manganese steel welds
by N. Smith and B. I. Bagnall 63
Steel specifications in Japan and the Welding engineer
by R. G. Baker and F. M. Burdekin 70
The use of overstressing techniques to reduce the risk of subsequent brittle fracture - Part 2
by R. W. Nichols 75
Further fatigue tests of 1½ in. thick butt welds containing slag inclusions
by J. D. Harrison 85
Lamellar tearing in hot rolled steel
by D. M. Nicholls 103
Development of a zinc alloy coating for low carbon steel to improve resistance spot welding
by H. A. Jahnle 113
Deformation of longitudinal fillet welds subjected to a uniform shearing intensity
by P. Swannell 120
Development of flux covered electrodes for welding 18% Ni-Co-Mo maraging steel
by C. Roberts 127
Low voltage electron beam welding: Effect of process parameters
by M. J. Adams 134
Effect of sulphur on the production and fabrication of carbon manganese steel forgings
by J. Hewitt and J. D. Murray 151
Continuous welded rails
by J. Dearden 158
Anglo-German Welding Conference 159
Manufacture of welded steel pipe and tube
by C. E. Veall, J. Donaldson and D. H. Woodward 170
Hot cracking in austenitic stainless steel weld deposits
by H. Fredriks and L. J. van der Toorn 178
Effect of fit-up on heat-affected-zone cold cracking
by B. A. Graville 183
Effect of hydrogen concentration on hydrogen embrittlement
by B. A. Graville 191
Introducing The Welding Institute 201
The Welding Institute 203
Fabrication of cryogenic pressure vessels
by B. H. Baker and J. A. Lucey 205
Welding of high yield steels
by W. H. Winn 214
Fracture control of thick steels for pressure vessels
by A. A. Wells 221

Effects of welding and post-weld heat treatment on the fracture toughness of Mn-Cr-Mo-V steels
by G.G. Saunders and R.E. Dolby 230
CO_2 welding with flux cored wires
by G.R. Salter 241
Fracture toughness concepts applied to the zones of welded joints
by C.L.M. Cottrell 262
Fracture testing of weldments in structural steels
by F.M. Burdekin 268
Fatigue of welded military structures
by T.R. Gurney 276
Weld cracking - a modern insight
by R.G. Baker 283
Chairmen's reports of Commissions
International Institute of Welding 296
Application of weld performance data
by R. Clough 319
Welding of pressure vessels: A review of problems associated with welding in the pressure vessel industry 326
Weldability of high strength martensitic stainless steel
by J.L. Kaae 333
Corrosion of AISI type 304 austenitic stainless steel
by T.G. Gooch 345
New plasma spraying and its application
by Minoru Okada and Hiroshi Maruo 371
The Robertson crack arrest test
by the Navy Department Advisory Committee for Structural Steels . . 387
Mechanical properties, microstructure and susceptibility to cracking in the HAZ of controlled-rolled, niobium treated, low carbon manganese steels
by J.L. Kaae 395
Toughness in electroslag welds
by K.P. Bentley 408
Orbital welding for the construction of steam generating plant tube work
by L. Henderson 424
Internal friction of weld metal
by G. den Ouden 436
Fatigue properties of repair welded cast steel
by F. de Kazinczy 447
High voltage electron beam welding: Effect of process parameters
by M.J. Adams 451
Explosive welding of tubes and tubeplates
by M.D. Chadwick, D. Howd, G. Wildsmith and J.H. Cairns . . 480
Arc efficiency and heat flow in inert-gas welds
by K. Bromage 493
Ageing of steels and its relation to weldability
by J. Vrtěl 501
Electron beam delineation and penetration
by A. Sanderson 509
Overstressing as a means of reducing the risk of subsequent brittle fracture
by R.W. Nichols 524
Effect of nitrogen on fissuring in mild steel weld deposits
by J. Wegrzyn and R.L. Apps 532
Effect of shot peening on the fatigue properties of maraging steel and Al-Zn-Mg alloy
by F.E. Brine, D. Webber and H.G. Baron 541
Improved techniques for determining transformation temperatures during simulated welding conditions
by R.H. Phillips 547

Fused zone structures in arc welded deposits of a commercial Al-Mg-Mn alloy
by M. F. Jordan and M. C. Coleman 553
Select Conference on Explosive Welding
by M. J. Turner 559
Thermal cycles and straining effects in a multipass butt weld
by M. G. Dawes 563
Second Conference on the Significance of Defects in Welds . . . 571
Behaviour of the sub-standard Charpy V-notch impact specimen for mild steel
by B. Hogan and B. Cotterell 584
Selection of weldments to avoid fracture initiation
by F. M. Burdekin, M. G. Dawes, G. L. Archer, F. Bonomo and G. R. Egan . 590
Effect of peening and grinding on the fatigue strength of fillet welded joints . 601
Resistance butt welding of 0·8% carbon steel
by I. F. Squires 610
Suitability of steels for electroslag welding
by J. Zeke and Eva Malinovská 621
Wide plate tests on 2½ in. thick T1 steel
by F. M. Burdekin, C. C. Woodley and D. J. Widgery . . . 627

LETTERS TO THE EDITOR

Unseemly Haste, by D. W. Smith 6
Welding of Aluminium Alloy NP8, by J. G. Young 74
Oxygen blown Steel, by M. G. Gemmill 267
by J. D. Murray 267
Education and Training, by L. M. Gourd 275
Hydrogen and Fatigue, by W. Beck 407, 470
by J. D. Harrison 407, 470
Orbital Welding, by F. Hirschmann 626
by L. Henderson 626
